REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Upon further consideration, it is agreed that the primary reference, Williams (5,709,103), teaches away from the addition of a water separator. Thus, while water separators similar to the one claimed by applicants are known in the air cycle cooling art, there exist no motivation to combine the water separators with the air cycle system of Williams. Williams attempts to remove the need for a water separator to make a simpler device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
